In the figure, we observe:

- **Fiery Peak (1679 m)**
- **Livingstone Fault**
- **Caples Terrane - quartzofeldspathic schist**
- **Basal Dun Mountain Ophiolite - peridotite and serpentinised peridotite**
- **Pods of massive serpentinite and rodingite**
- **Serpentinite shear zone**
- **Area of Figure 4**
- **Progressive serpentinisation**

These geological features are part of the study of tectonic and metamorphic processes in the region.
